20 Years of Leadership with CEO and 10 Year Anniversary in St. Charles Facility

Bison Gear and Engineering Corp.'s future shines brightly this month. Twenty years ago this month, CEO, Ron Bullock, purchased Bison Gear and has worked to consistently expand its size, scope and mission to become a world class gearmotor, electric motor and gear reducer manufacturer. Since 1987, Bison has tripled employment and increased sales sevenfold.

Bison is also celebrating its 10 year anniversary in its custom built, state-of-the-art manufacturing facility and corporate headquarters in St. Charles, IL. The St. Charles facility has given Bison Gear the opportunity to combine R&D and Bison Electric's DC motor operations in house, in addition to adding AC motor production in 2006. The Bison facility encompasses enough land to almost double manufacturing space, which at its current growth rate is imminent.

To express appreciation to the loyal and enthusiastic team of associates, customers and suppliers who have contributed to its success, Bison will host a "Celebrate the Past and Look Toward the Future" open house on Friday, May 25, 2007, from 1 to 5 p.m. at the Bison facility. About Bison Gear & Engineering Corp.

Founded in 1960, Bison Gear & Engineering Corp. designs and manufactures fractional horsepower electric motors, gearmotors and gear reducers used in industrial and commercial OEM applications worldwide. Bison's strong engineering tradition, based on Robusticity™ principles, offers products with up to twice as much torque in the same package size as competitors. Bison employs over 240 associates in its St. Charles, Illinois facility which produces gearmotors and reducers in parallel shaft and right angle configurations, as well as AC and DC motors, for applications where dependability and long lifetimes are important.
