For Immediate Release

**Bison Now Offers Low Volt Gearmotors:
12 and 24 Volt PMDC Gearmotors**

Available from stock, Bison's new 12 Volt DC parallel shaft products are available in horsepower ranging from 1/20 Hp to 1/6 Hp. The new motors are mounted on our most popular gear cases, the Bison 100 and 300 Series. The 100 Series offers a wide speed range and many voltage options in an ultra-compact package. Torque ratings are up to 100 in-lbs continuous. For up to 300 in-lbs, the Bison 300 Series is unmatched in voltage and speed options. Bison motors and gearmotors are available throughout the US and Canada. Contact Bison today to locate your closest Bison distributor, or to discuss your low volt application.
