Inverter Duty Gearmotors from Bison

Bison's inverter duty gearmotors deliver variable speed performance with constant torque. Units have been rated from 6 Hz to 90 Hz for a full speed range. Available in 1/4 and 1/2 horsepower, the 230V 3-phase units run cooler than the competition and are offered in both parallel and right angle configurations. The full line is available from stock for immediate shipment.

Bisongear.com gets a new look

Bison Gear and Engineering has re-designed their website to reflect the wants and needs of their users. Now available is a competitive cross reference and specification search capability, as well as a location specific printable spec sheet. Simply enter your zip code to find your closest sales rep and Bison distributors! Bison has also created an e-commerce function to offer all standard Bison product to consumers online.

Bison Introduces New Catalog Specification Guide

New in fall of 2004, the new Bison catalog features improved drawings, new products, and a feature section on our custom capabilities.
